DC Rack Rentals
sales@ccierack.rentals | support@ccierack.rentals | skype: cciedcracks

Home Equipment Pricing scheduler Contact Us Rack Support

Your #1 source for online Cisco DC Rack rentals

We Provide Cisco Datacenter equipment for rent. Provided equipment is with all necessary licenses for testing, learning practicing features like OTV, FabricPath, MPLS, FCoE, FCIP, Routing, Boot From SAN.

Our equipment supports full-scale IPexpert and INE labs from their preparation workbooks. Upon request custom topologies can be build to practice particular technology/feature. Please contact us and send your topology diagram so we can ensure that we can build it for you.

Why US?

The CCIE lab requirements are always changing and so are we. We are dedicated to providing our users the best remote online rack lab experience possible. We hope to provide you the tools you need to successfully prepare for the various Cisco Certifications

Home | Pricing | Cancellation and Refund policy | Privacy Policy
© 2015 DC Rack Rentals. Theme by ccierackrentals.

- **For Support you can reach us from above LIVE SUPPORT FROM WEBSITE or else add us on skype id ccierack.rentals**

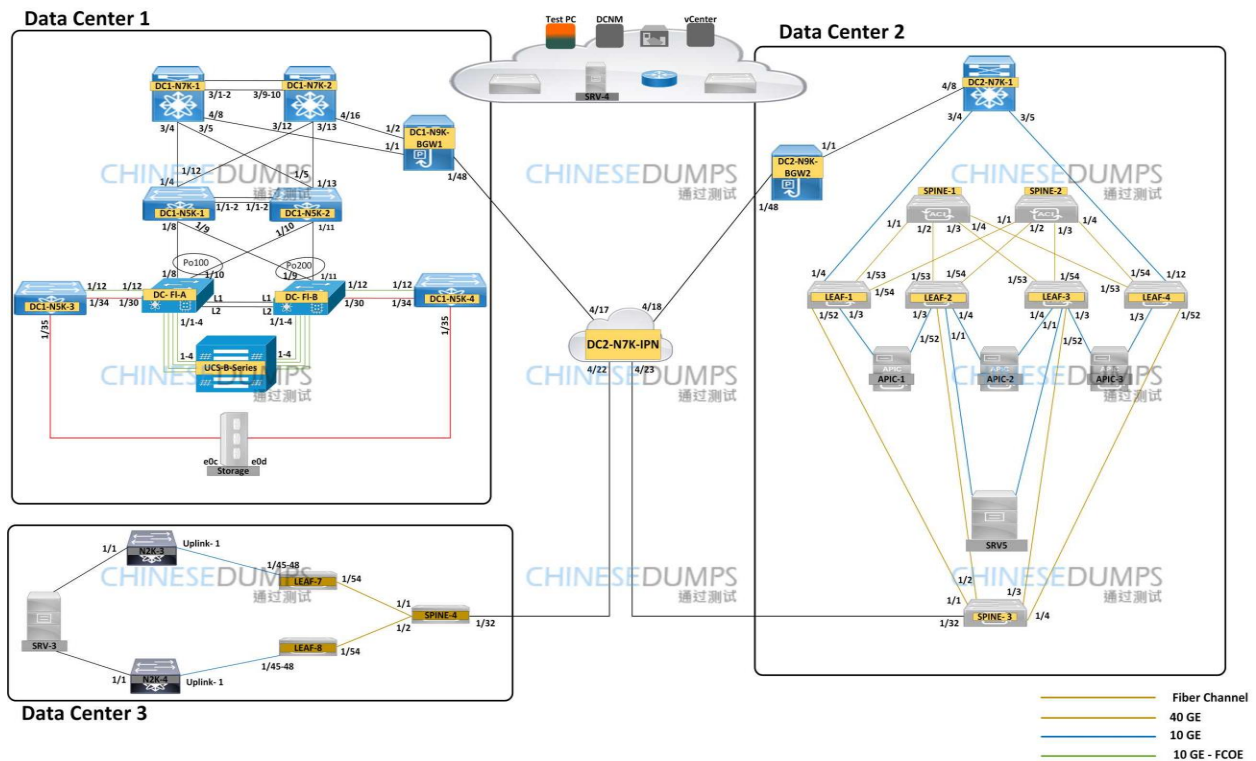

IMPORTANT:-

- 1) Putty should be there in your machine.**
- 2) It will only work from Mozilla so do not use any other explorer.**
- 3) For any issues and queries for support add us on skype id ccierack.rentals**

DC RACK 1

- 4) RACK1 – DC1 --- <http://rack1.ccierack.rentals:100>
RACK1 – DC2 --- <http://rack1.ccierack.rentals:200>**
- 5) For above url authentication all userid and password will be in USER PORTAL and userid/password will be always the same.**
- 6) All the device userid and pass is admin/Cisco!123**
- 7) To access UCS you have to access from mstsc from the topology page and it will ask for userid and pass will be admin/Cciedc01 or admin/Cisco!123**

Click Start your lab after this click on submit and begin your lab

To get the access of any device you have to just click on it and it will ask you to open it from application just select putty and it will telnet to box directly and you can access the device.

Userid and pass for any vdc and device is admin/Cisco!123

How to make the rack with basic Pre-config

DC1-7K's:

=====

rollback running-config checkpoint DC1-N7K-1 best-effort verbose

SECTION 3: - ACI

MOST IMP: - DO NOT DELETE EXISTING FABRIC *****

You can use the Lab pre-config just rollback the preconfig and start your task.

SCRIPTING SERVER

You can ssh : 10.1.1.220 userid : ccie01 pass : Cisco!123

Access to images.

<https://10.1.1.215>

ccie@cisco.com

Cisco!123

DCNM

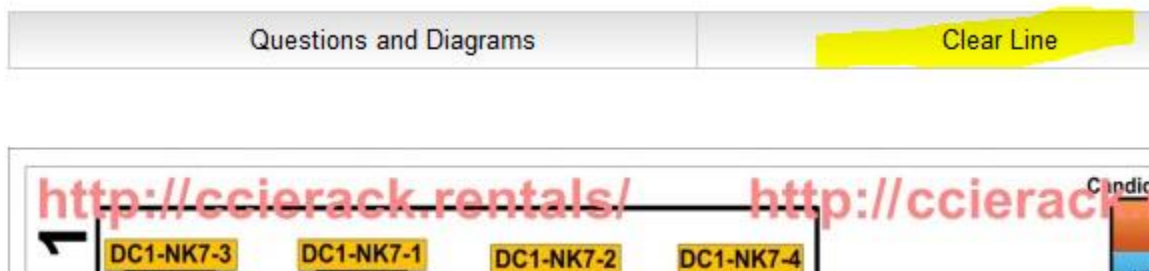

<https://10.1.1.217/>

admin/Cisco!123

BASIC TROUBLESHOOTING

If you are you not getting telnet to other device you have to do clear line from console router then try it again. You will surely get the access to the device.

In the Image topology you will have a console router just click on it and clear the line of any device to get the access.

In the Below Image topology you will have a console router just click on it and clear the line of any device to get the access.
