The screenshot shows the CCIE Rack Rentals dashboard. The top navigation bar includes the logo, a menu icon, the time (13:29:58 2016-11-30), and the user profile. The main content area is titled 'Dashboard Control panel' and features a section for 'Upcoming Reservations'. This section contains a table with the following data:

#	Track	Rack	Username/Password	Start	Finish	Length
1	Datacenter	Rack1DC1	a4a6e7c5	2016-12-01 00:00:00	2016-12-01 04:00:00	4hour
2	Datacenter	Rack1DC2	70a279fc	2016-12-01 00:00:00	2016-12-01 08:00:00	8hour

Below the table, a note states: 'Note: It may take upto 10 minutes to show your reservation here otherwise contact us.' The footer contains copyright information for 2014-2015 and the version number 1.1.5.

KINDLY NOTE:-

THIS IS THE USERID TO ACCESS THE RACK

AS PER ABOVE SCREEN

**DC1 USERID / PASS
a4a6e7c5 / a4a6e7c5**

**DC2 USERID / PASS
70a279fc / 70a279fc**

**EVERY USER WILL GET DIFFERENT USERID/PASSWORDS and all will be
in their USER PORTALS**

Collaboration | Security | Wireless | Datacenter | Service Provider | R & S
www.ccierack.rentals

Click on the device and it will open the putty

- **For Support you can reach us from above LIVE SUPPORT FROM WEBSITE or else add us on skype id ccierack.rentals**

IMPORTANT:-

- 1) Putty should be there in your machine.
- 2) It will only work from Mozilla so do not use any other explorer.
- 3) For any issues and queries for support add us on skype id **ccierack.rentals**

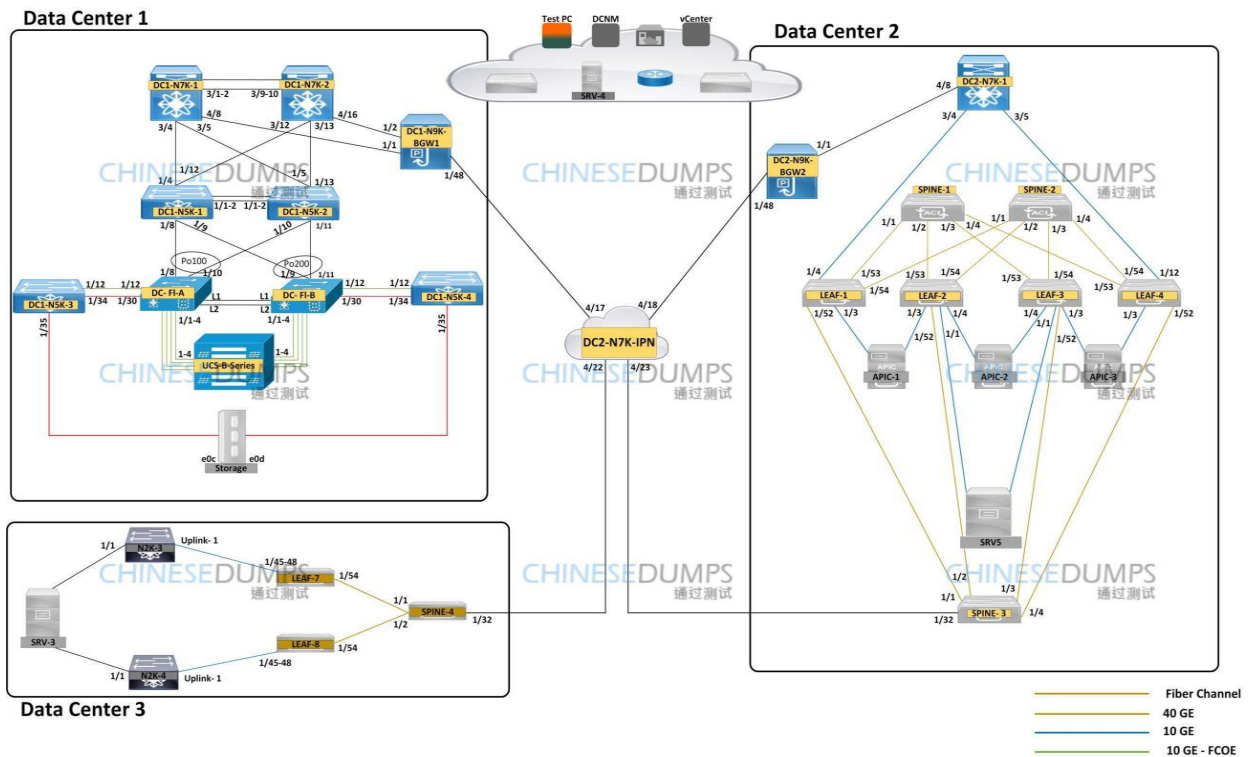

DC RACK 1

- 4) RACK1 – DC1 --- <http://rack1.ccierack.rentals:100>
RACK1 – DC2 --- <http://rack1.ccierack.rentals:200>
- 5) For above url authentication all userid and password will be in **USER PORTAL** and userid/password will be always the same.
- 6) All the device userid and pass is **admin/Cisco!123**
- 7) To access UCS you have to access from mstsc from the topology page and it will ask for userid and pass will be **admin/Cciedc01** or **admin/Cisco!123**

If anyone has any further queries or questions can reach us at skype id **ccierack.rentals** or else LIVE support from website or else email us at **support@ccierack.rentals**

HOW TO ACCESS THE RACK

Click Start your lab after this click on Submit and begin your lab

To get the access of any device you have to just click on it and it will ask you to open it from application just select putty and it will telnet to box directly and you can access the device.

Userid and pass for any vdc and device is admin/Cisco!123

How to make the rack with basic Pre-config

Section-1

Important notice: Do not execute **write erase** command on any of the devices

For LAB version 1

DC1-N7K-1 and 2

=====

rollback running-config checkpoint LAB-1 best-effort verbose

DC2-N7Ks

=====

rollback running-config checkpoint LAB-1 best-effort verbose

DC1-N5K-1 and 1

=====

Configuration file placed in TEST-PC, copy and paste the file.

DC1 and DC2 BGWs

=====

rollback running-config checkpoint LAB-1 best-effort verbose

**Note: When you are practicing LAB version 1,
Consider DC2-N7K-SW2 as DC2-N7K-1 switch**

For LAB version 2

DC1-N7K-1 and 2

=====

rollback running-config checkpoint LAB-2 best-effort verbose

DC2-N7Ks

=====

rollback running-config checkpoint LAB-2 best-effort verbose

DC1-N5K-1 and 1

=====

Configuration file placed in TEST-PC, copy and paste the file.

DC1 and DC2 BGWs

=====

rollback running-config checkpoint LAB-2 best-effort verbose

Section-2

UCS backups are stored in Test-PC download folder

For LAB version 1

Please use **ucs-blank-config.xml** file

Username : admin

Password : Cciedc01

For LAB version 2

Please use **LAB-2_UCS.xml** file

Username : admin

Password : Cisco!123

Section-3

MOST IMP: - DO NOT DELETE EXISTING FABRIC *****

You can use the Lab pre-config just rollback the preconfig and start your task.

For LAB version 1

The screenshot shows the Cisco APIC web interface. The top navigation bar includes 'System', 'Tenants', 'Fabric', 'Virtual Networking', 'L4-L7 Services', 'Admin', 'Operations', 'Apps', and 'Integrations'. The 'Admin' tab is active, and the 'Config Rollbacks' sub-tab is selected. A table of configuration snapshots is displayed, with the most recent snapshot highlighted. The details panel on the right shows the selected snapshot's file name and size, along with a 'Rollback to this configuration' button.

Snapshots	File Name	Description	File Size (bytes)

Rollback to this configuration

For LAB version 2

The screenshot shows the APIC Config Rollbacks interface. The main table lists various snapshots with columns for Snapshots, File Name, Description, and File Size (bytes). The snapshot for 'LAB2' is highlighted in yellow. To the right, the 'Configuration' panel shows details for the selected snapshot, including the file name and size. A 'Rollback to this configuration' button is visible at the bottom right of the configuration panel.

BASIC TROUBLESHOOTING

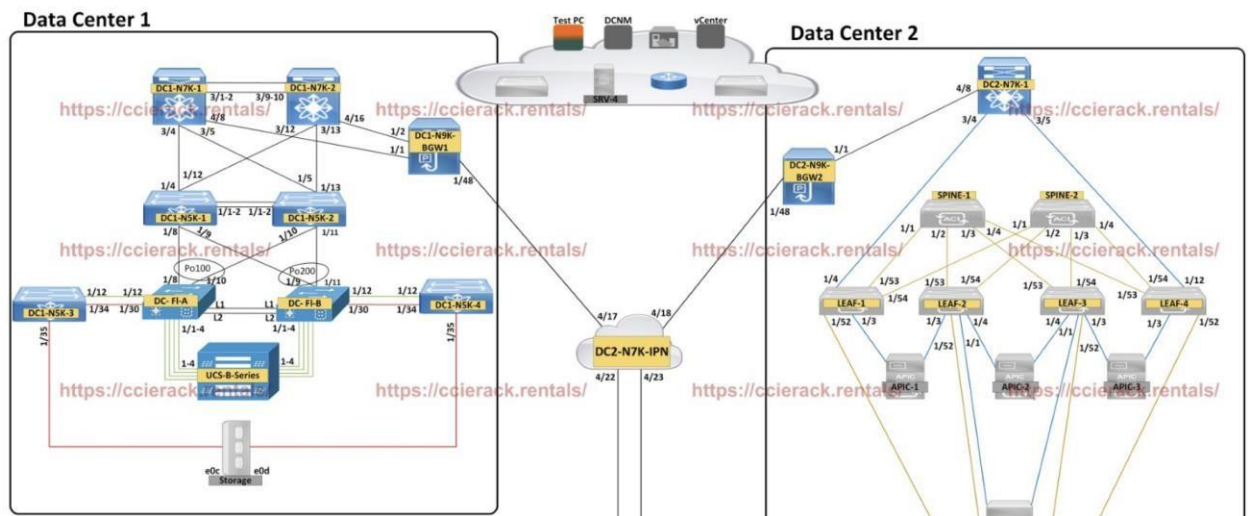

If you are you not getting telnet to other device you have to do clear line from console router then try it again. You will surely get the access to the device.

In the Image topology you will have a console router just click on it and clear the line of any device to get the access.

In the Below Image topology you will have a console router just click on it and clear the line of any device to get the access.

Oreles ClearLine Manually

UCS <https://10.1.1.40>

We have kept the blank (ucs-blank-config.xml) on student desktop from which you can refresh the UCS
